Sidelite

3 Hardware

Basic hardware included. Upgrade options available.

4 Ball-Bearing Hinges

Hinges with ball bearings protect each hinge pivot, offering added support and stability to help keep your door opening and closing smoothly.

5 7-Shape Corner Seal Pads

(Inswing Only) This innovative design creates a protective air pocket that helps prevent a vacuum from wicking moisture up the weatherstrip.

6 Composite Adjustable Sill

Inswing and outswing composite sills resist rotting and insects. Inswing adjustable sills help to maintain a tight seal over time.

7 Dual-Bulb / Dual-Fin Bottom Sweep

(Inswing Only) Two bulbs compress to sit tight against the sill, while two fins act like walls to form barriers and a built-in rain deflector pushes moisture away.

8 Sill Pan

Fits between the sill and subfloor for an added layer of protection against moisture. Engineered with sloped channels to help collect and drain moisture away.

9 Glass Options

10 Finish — Paint or Stain

11 Adjustable Security Strike Plate

(Not available on all configurations) Helps enhance the safety and security of a home, wrapping around the door jamb and fully engaging the frame of the house for added support and strength against forced entry.

1 Rot Resistant Frame

Standard product features rot resistant frame. Composite frame offered as an option. The composite frame offers the strength and stability of wood but will not rot, warp or split, and is resistant to mold and mildew.

2 Removable Weatherstrip

Our resilient design compresses when closed and springs back when opened. It's protected by a durable jacket for long-lasting sealing power.

Note: See your Therma-Tru seller or visit www.thermatru.com for details on limited warranties and exclusions, and ENERGY STAR qualified products.
